Office Action Summary	Application No. 10/775,865	Applicant(s) BARGE ET AL.	
	Examiner Robert Rose	Art Unit 3723	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Receipt is acknowledged of Applicant's Prior Art Statement, filed February 9, 2004.
2. Applicant's election with traverse of Group I in the reply filed on March 7, 2005 is acknowledged. The traversal is on the ground(s) that the inventions are so closely related as to be best examinable in a single application. This is not found persuasive because as shown in the restriction requirement the inventions were shown to be both independent and distinct. Moreover the inventions would have non-coextensive fields of search, necessitating that a burdensome search be conducted.

The requirement is still deemed proper and is therefore made FINAL.

3. Claims 29-41 have been canceled by Applicant.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 4, and 42-43 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claims 4, and 42 the phrase "from out of the cradle support" is not understood. Should this phrase be "out of the cradle support"? In claim 42, lines 8-9 the phrase "once the clamped thereonto..." and "of the jaws caused..." is non-grammatical. In claim 42, lines 12-13 "the projecting element" lacks a proper antecedent basis.
5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

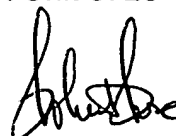

Art Unit: 3723

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Shinichi(Japan No. 240355). Shinichi discloses an apparatus for splitting apart a substrate comprising two adjoining wafers comprising all of the subject matter set forth in Applicant's claims above. Splitter means(20)(21) comprising moving jaws(24) are applied to opposite sides of the substrate to split the substrate into two wafers. A suction device withdraws one of the two wafers.
7. Claims 5-28 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
8. Claims 4, and 42-43 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hillberry et al, and Wilkes are cited of interest to show other apparatus for splitting wafers from a substrate utilizing a mechanical wedge shaped member.
